PROFILE

Business Analyst with hands-on experience translating business strategy into clear, actionable IT requirements, gained as a Business Systems Analyst at Grameenphone (Telenor Group). Skilled in requirement engineering, business process analysis, and cross-functional stakeholder facilitation, underpinned by an Electrical & Electronic Engineering foundation from CUET that strengthens technical fluency when liaising with Engineering and Architecture teams. Delivered SOPs and Software Requirement Specifications for a new B2B infrastructure service, drove competitor and market analysis that shaped go-to-market strategy presented to leadership, and translated complex technical systems into stakeholder-friendly documentation. Proven leader who revived a dormant 250-participant social enterprise program and broke IEEE's all-time membership record. Published ML researcher and top-9% global case competitor, bringing strong analytical rigor to business problem-solving.

EDUCATION

Chittagong University of Engineering & Technology (CUET)

Bachelor of Science in Electrical & Electronic Engineering

- CGPA: **3.69/4.00**

Chattogram, Bangladesh

Graduated June 2026

PROFESSIONAL EXPERIENCE

Business Systems Analyst Intern

June 2026 – Sept 2026

Nextern, deployed at Grameenphone Ltd. (Telenor Group) – Infrastructure & Adjacent Business (B2B)

Dhaka, Bangladesh

- Designed end-to-end requirement engineering and process workflows for Grameenphone's new non-data center colocation service by facilitating discovery sessions with 5 cross-functional business units, using Visio to model the end-to-end business process flow, and translating operational needs into clear SOPs and Software Requirement Specifications (SRS) that aligned stakeholders across Operations, Sales, and IT.
- Supported demand assessment and business value analysis by independently benchmarking 15+ competitor pricing models and business structures, then synthesizing insights into a commercial recommendation that directly shaped the go-to-market pricing strategy presented to leadership.
- Applied EEE background to map the data center's end-to-end power flow architecture and translate the technical model into stakeholder-friendly language, helping Operations and Sales teams validate infrastructure requirements and accelerating decisions by reducing repeated clarifications.
- Reviewed 2025–2026 invoices for the site sharing business within the IAB (Infrastructure & Adjacent Business) team, identifying recurring discrepancies and billing issues to support revenue assurance and process improvement.

Research Assistant

Oct 2024 – Dec 2025

STARLAB, Institute of Energy Technology, CUET

- Generated, cleaned, and preprocessed large-scale experimental datasets for machine learning models (Random Forest, XGBoost, LightGBM), enabling predictive analytics for advanced materials research.
- Co-authored multiple peer-reviewed publications by managing data preprocessing and supporting predictive analytics efforts.

LEADERSHIP & IMPACT

Head of Department

Jan 2025 – Apr 2025

Hult Prize at CUET – World's Largest Student Social Entrepreneurship Competition

- Relaunched the Hult Prize On-Campus Programme after a **four-year hiatus** by leading budgeting, vendor management, and logistics, delivering an event for **250+ participants** that earned the **Best Organizing Committee Award**.
- Directed cross-functional teams across marketing, operations, design, and sponsorship, ensuring on-time delivery under strict timelines.

Organizing Team Member

Jun 2025

TEDx CUET – First Edition

- Managed guest coordination, scheduled speaker sessions, and ensured timely delivery of all talks during the first-ever TEDx event at CUET.

Membership Campaign Lead

Oct 2024 – Dec 2024

IEEE CUET Student Branch

- Launched and led a membership growth campaign that drove **400+ new IEEE members**, the highest recruitment total in the Student Branch's history.
- Coordinated volunteer teams and promotional activities across multiple academic departments to sustain campaign momentum.

ACHIEVEMENTS

Top 9% Globally – CBS International Case Competition (Novo Nordisk market-entry case)	2024
1st Runner-Up – Discussion with the Changemaker (Chattogram waterlogging solution)	2025
2nd Runner-Up – Face the Case 3.0 (EV adoption strategy, Bangladesh)	2023
IEEE R10 Ethics Champion – 70%+ score, Region 10 Ethics Super Power Challenge	2024

CERTIFICATIONS

Supervised Machine Learning: Regression and Classification	Sep 2024
<i>Coursera / Stanford University – Credential ID: Z8LIXI6XEQ7E</i>	<i>Show Credential</i>
Data Analytics with AI	In Progress
<i>Grameenphone Academy</i>	
Zero-Code App @ Vibe Coding	Jun 2026
<i>Grameenphone Academy</i>	<i>Show Credential</i>

WORKSHOPS & TRAINING

Health, Safety & Security (HSS) Workshop	Jul 2026
<i>Grameenphone Ltd.</i>	
• Trained in workplace safety protocols, emergency response, fire evacuation procedures, and security awareness.	
Corporate Culture & Etiquette Training	Jun 2026
<i>Grameenphone Ltd.</i>	
• Trained in professional communication, corporate etiquette, workplace conduct, and organizational culture.	

SKILLS

Business Analysis & Requirement Engineering: Requirement Engineering, Business Process Modelling, SOP & SRS Documentation, SDLC Exposure (Agile & Waterfall), Demand Assessment & Prioritization, Market & Competitive Research, Stakeholder Management, Cross-functional Facilitation, Solution Validation
AI & Data Literacy: Python, Power BI, Pandas, NumPy, Scikit-learn, Machine Learning (Random Forest, XGBoost, LightGBM), Predictive Analytics
Tools: Microsoft Excel, Microsoft PowerPoint, Visio, Jira, Confluence, MATLAB, Git/GitHub, LaTeX

PUBLICATIONS & RESEARCH AREAS

Research Areas: Machine Learning for Materials Discovery, Renewable Energy Systems, Perovskite Solar Cells, Energy Harvesting Devices
Simulation and Optimization of a CsSnI ₃ /CsSnGeI ₃ /Cs ₃ Bi ₂ I ₉ Triple Absorber Layer Perovskite Solar Cell – <i>Journal of Physics and Chemistry of Solids</i> , 2025
MXene-Integrated Nanostructured PTFE Triboelectric Nanogenerators for Enhanced Energy Harvesting – <i>Under Review</i>
Numerical Modeling of Perovskite Tandem Solar Cell – <i>IEEE ICECCE 2025</i>
